

# Gulf of Mexico Harmful Algal Bloom Bulletin

Tuesday, December 26, 2017  
NOAA National Ocean Service  
NOAA Satellite and Information Service  
NOAA National Weather Service

Region: Texas

Instructions for viewing this geospatial pdf are available at: <https://go.usa.gov/xn9g2>.

## Conditions Report

No respiratory irritation associated with *Karenia brevis* (commonly known as Texas red tide) is expected in this region.

## Analysis

### Imagery:

Recent ensemble imagery (MODIS Aqua, 12/25) is obscured by clouds from Corpus Christi Bay to the Rio Grande. A patch alongshore Matagorda Bay shows elevated chlorophyll (2-3  $\mu\text{g/L}$ ), but none of the optical characteristics of *K. brevis*.

### Forecasts:

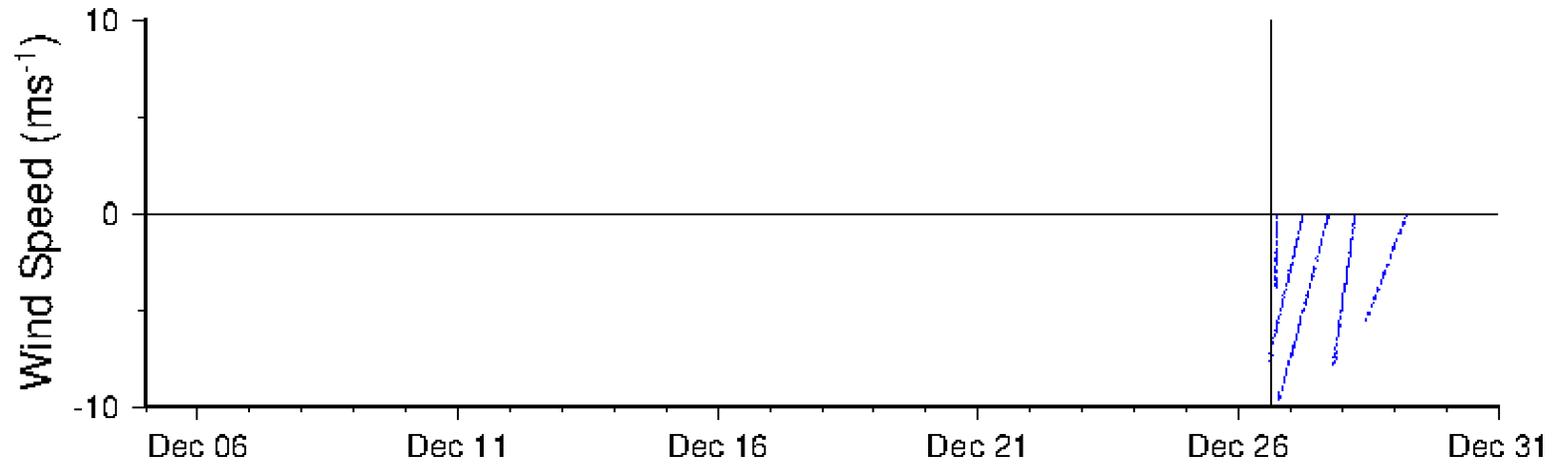

Forecast models based on predicted near surface currents indicate a potential maximum transport of 130 km south along the coast from Port Aransas from December 25-29.

Keeney, Urizar

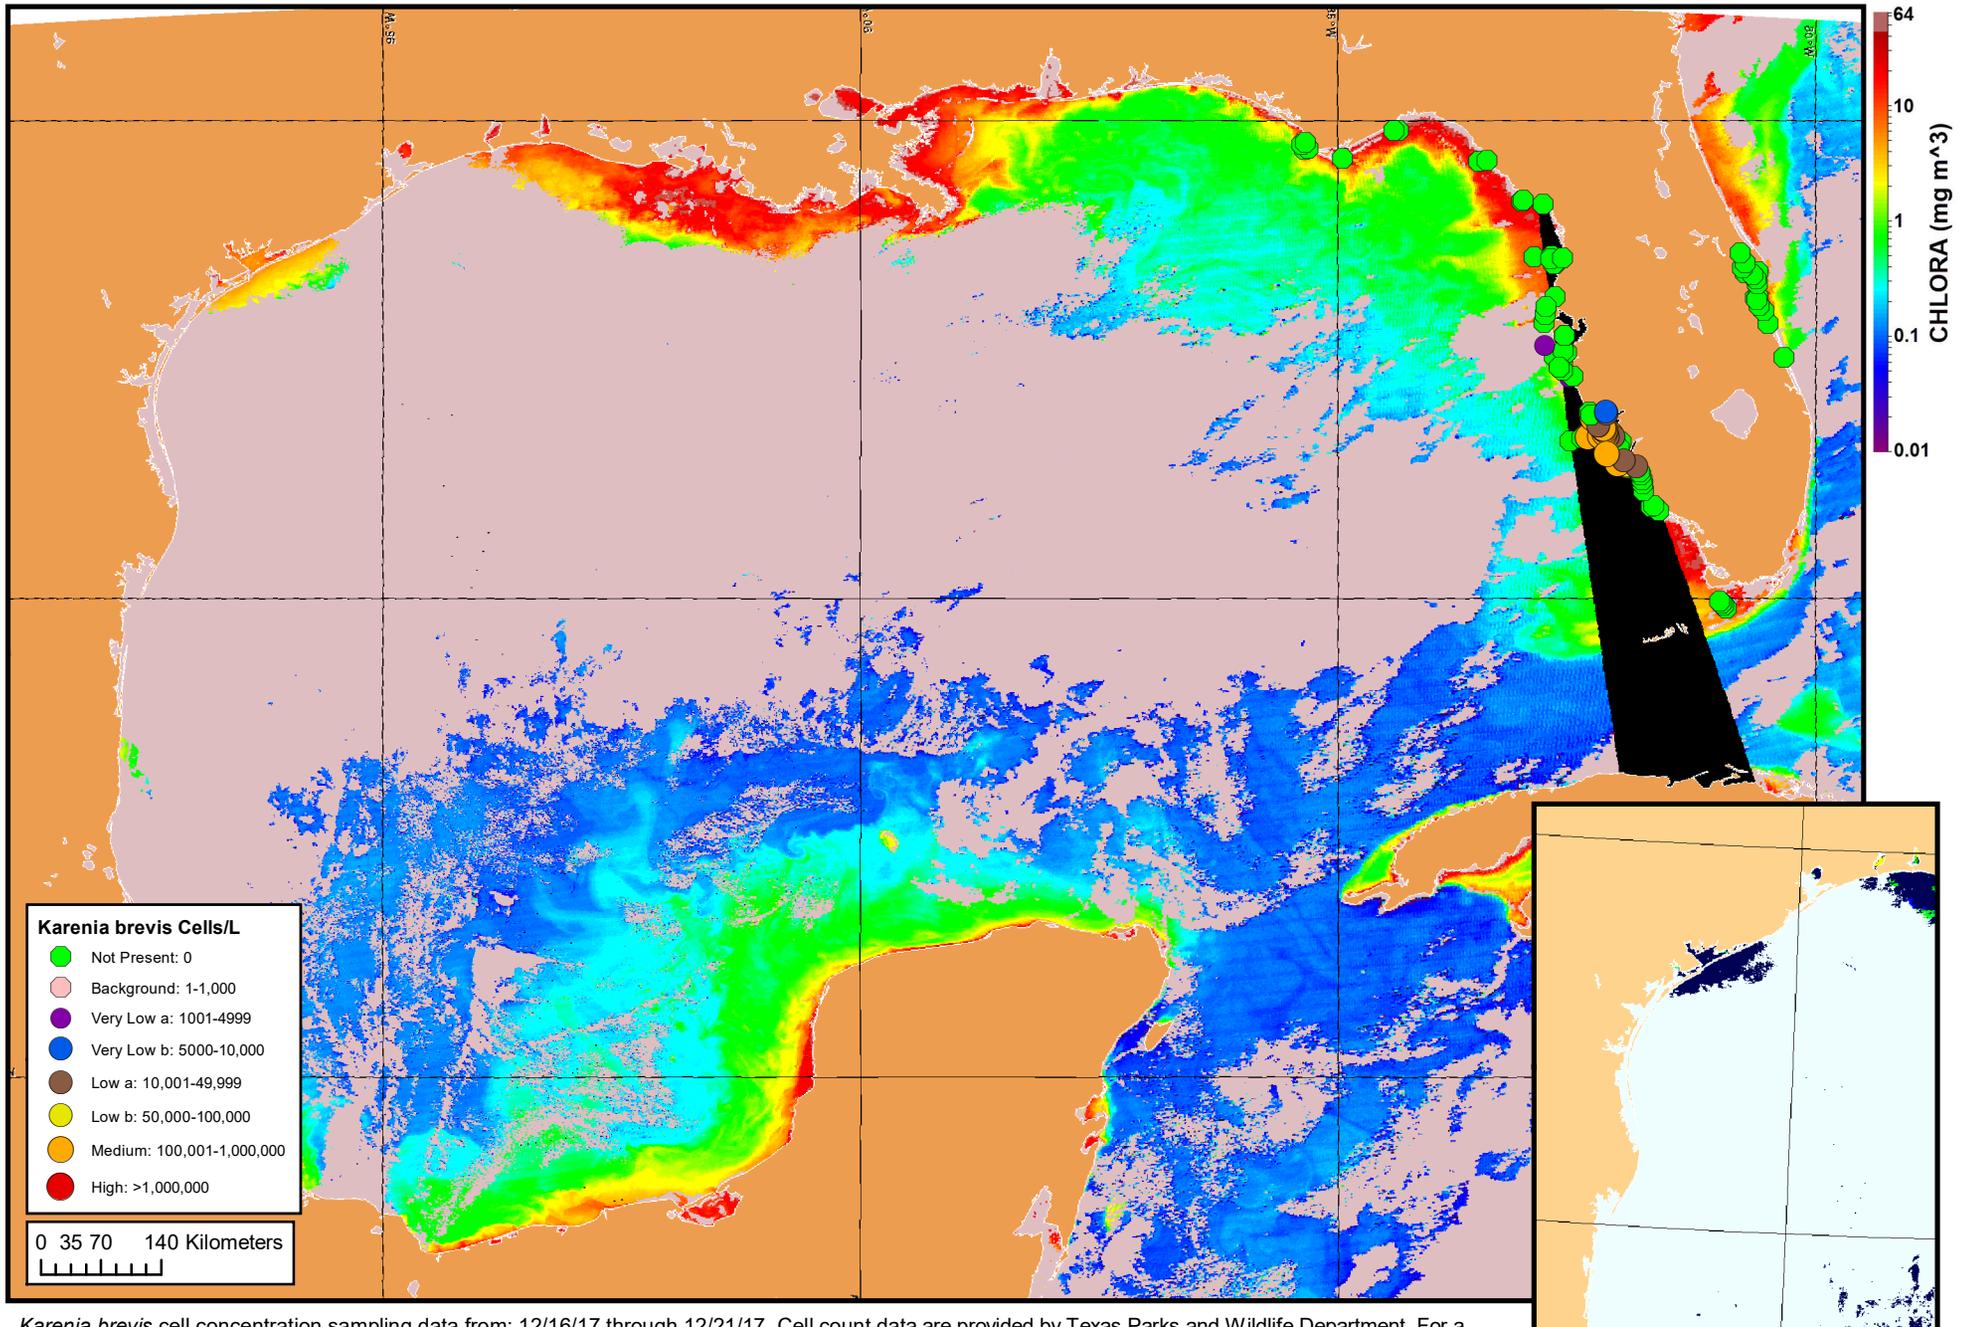

*Karenia brevis* cell concentration sampling data from: 12/16/17 through 12/21/17. Cell count data are provided by Texas Parks and Wildlife Department. For a list of sample providers and a key to the cell concentration categories, please see the HAB-OFS bulletin guide: [https://tidesandcurrents.noaa.gov/hab/hab\\_publication/GOMX\\_HAB\\_Bulletin\\_Guide.pdf](https://tidesandcurrents.noaa.gov/hab/hab_publication/GOMX_HAB_Bulletin_Guide.pdf). Detailed sample information can be obtained through the Texas Parks and Wildlife Department at: <http://www.tpwd.state.tx.us/landwater/water/enviroconcerns/hab/redtide/status.phtml>.

MODIS satellite chlorophyll image (12/25/17) with possible *K. brevis* HAB areas shown by red polygon(s).

### Wind conditions from Port Aransas-Coast, TX

Wind speed and direction are averaged over 12 hours from buoy measurements. Length of line indicates speed; angle indicates direction. Red indicates that the wind direction favors upwelling near the coast. Values to the left of the dotted vertical line are measured values; values to the right are forecasts. Wind observation and forecast data provided by NOAA's National Weather Service (NWS). A text summary of the marine forecast by region is available from NWS at <http://go.usa.gov/xnRax>.

*Karenia brevis* cell concentration sampling data from: 12/16/17 through 12/21/17. Cell count data are provided by Texas Parks and Wildlife Department. For a list of sample providers and a key to the cell concentration categories, please see the HAB-OFS bulletin guide: [https://tidesandcurrents.noaa.gov/hab/hab\\_publication/GOMX\\_HAB\\_Bulletin\\_Guide.pdf](https://tidesandcurrents.noaa.gov/hab/hab_publication/GOMX_HAB_Bulletin_Guide.pdf). Detailed sample information can be obtained through the Texas Parks and Wildlife Department at: <http://www.tpwd.state.tx.us/landwater/water/enviroconcerns/hab/redtide/status.phtml>.

Verified and suspected HAB areas shown in red. Other areas with *K. brevis* optical characteristics shown in yellow (see p. 1 analysis for interpretation).
