Region: Texas

Instructions for viewing this geospatial pdf are available at: <https://go.usa.gov/xn9g2>.

Conditions Report

No respiratory irritation associated with *Karenia brevis* (commonly known as Texas red tide) is expected in this region.

Analysis

Imagery:

Recent ensemble imagery (MODIS Aqua, 3/17) is obscured by clouds along- and offshore the Texas coast, limiting analysis. Elevated to high chlorophyll (2 to 12 µg/L) is visible from San Luis Pass to Sargent Beach, but it is most likely due to the resuspension of benthic chlorophyll and sediments along the coast.

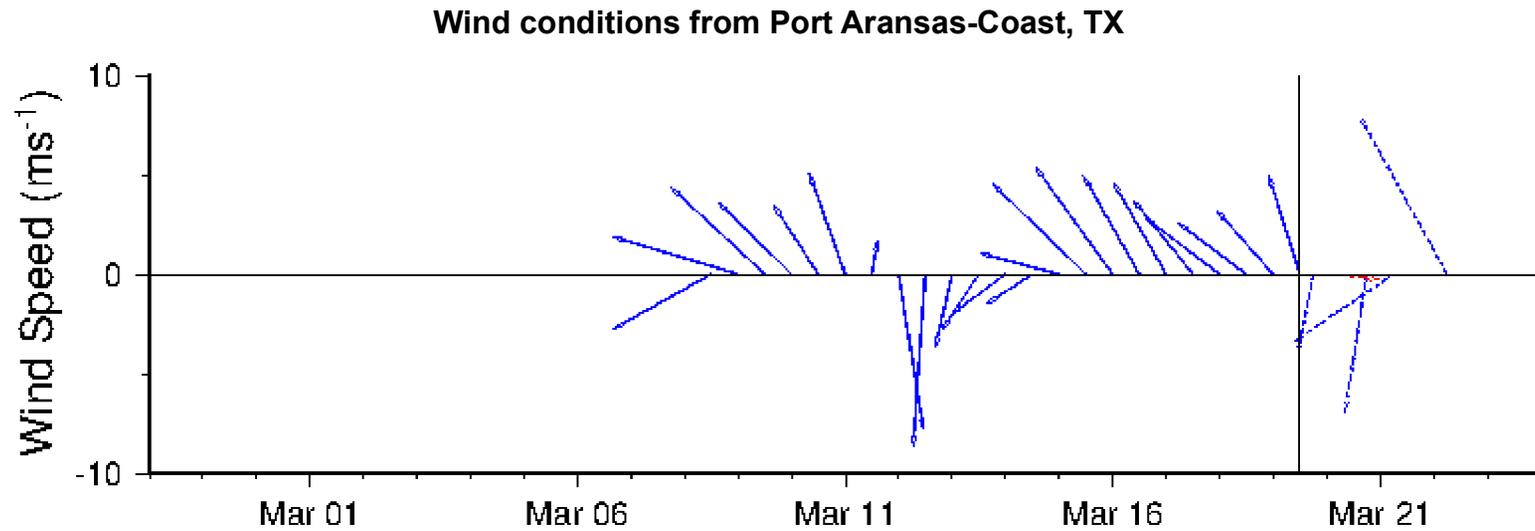

Forecasts:

Forecast models based on predicted near-surface currents indicate a potential maximum transport of 20 km south along the coast from Port Aransas from March 17 to 22.

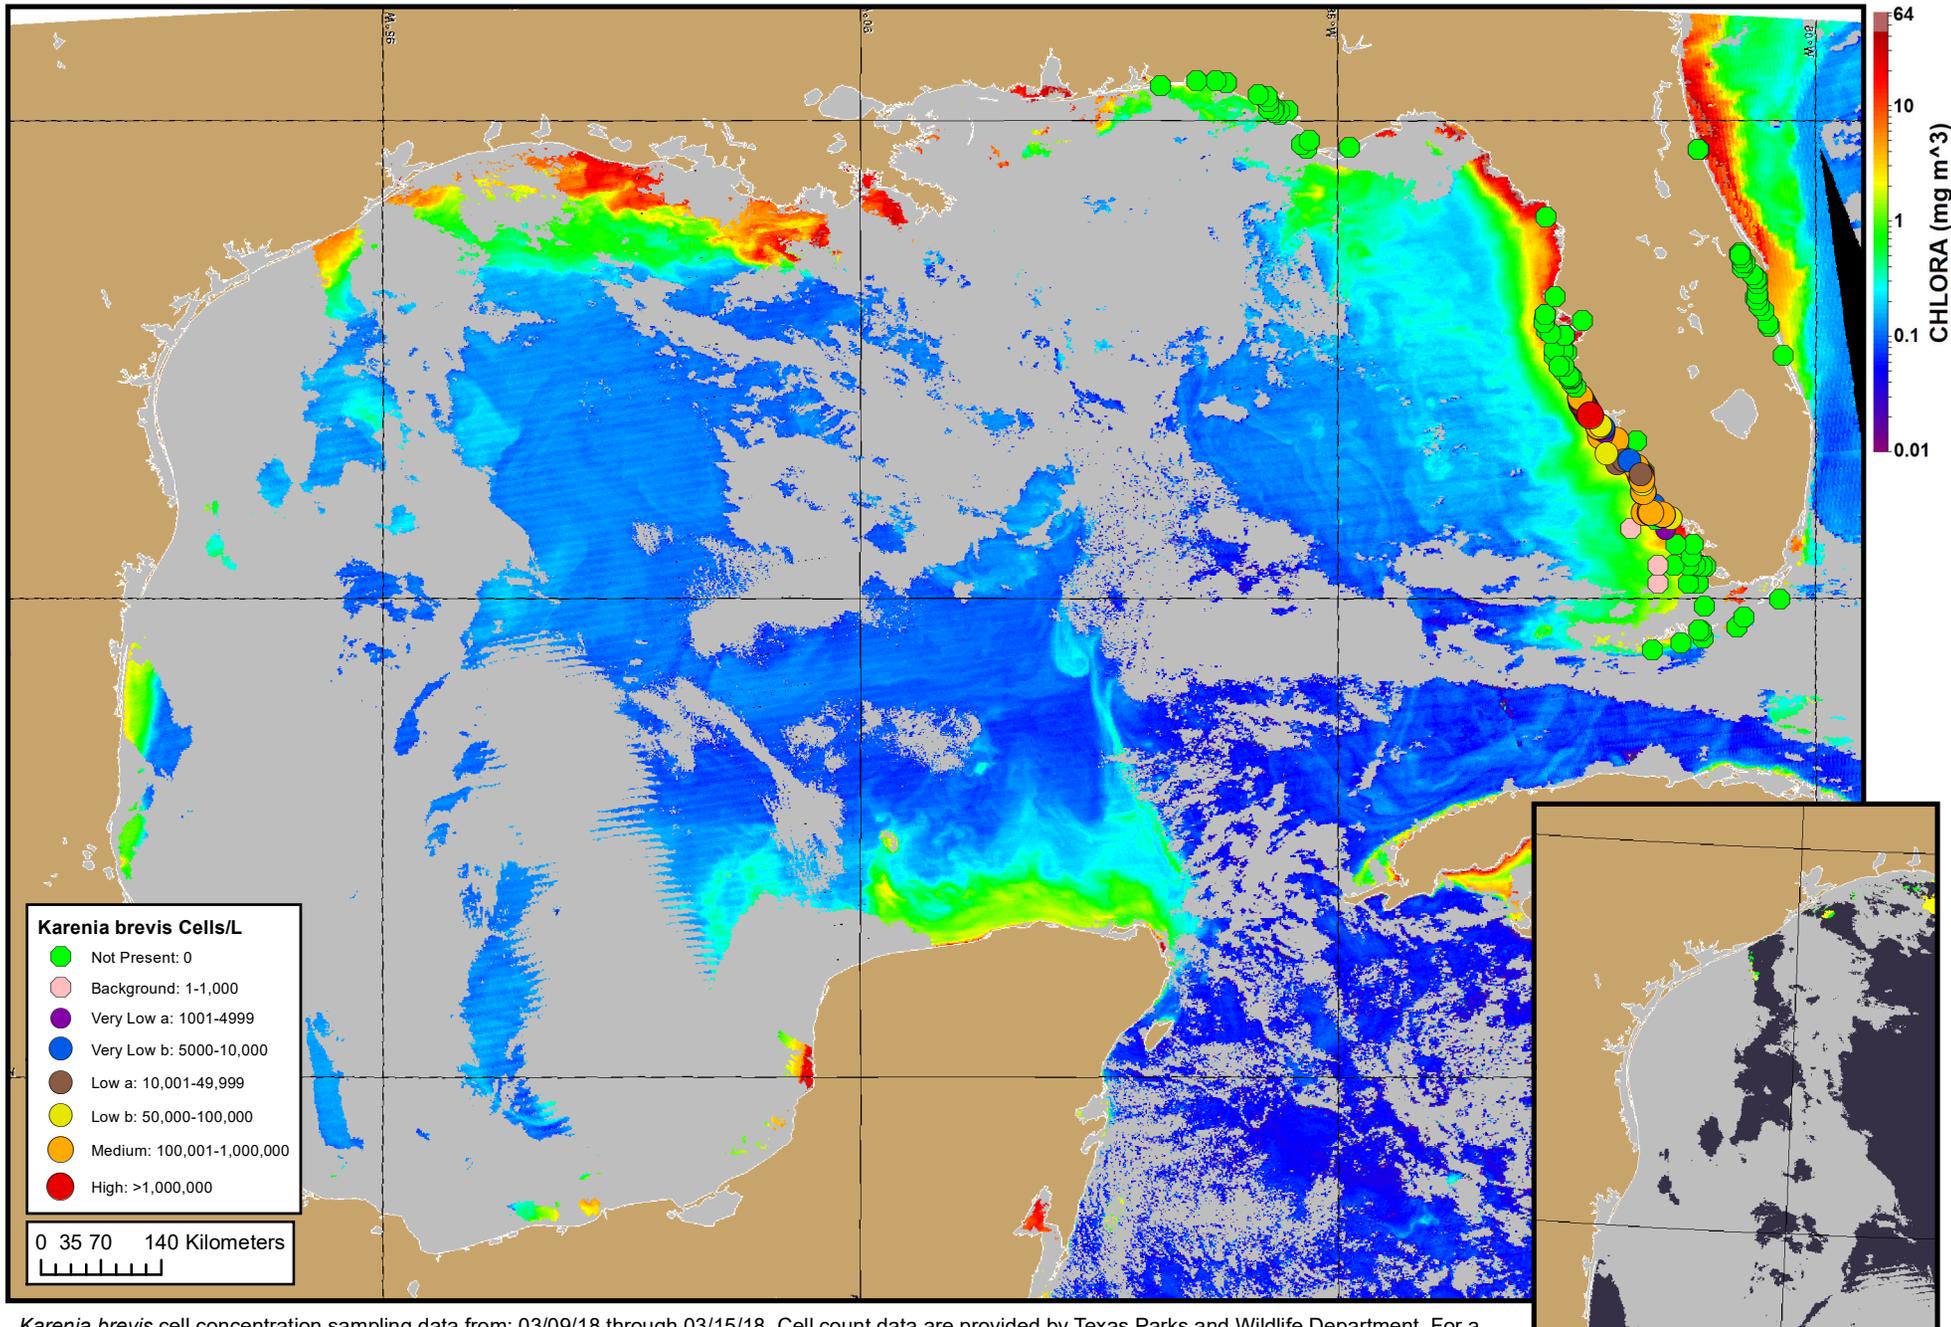

Davis, Ludema

Karenia brevis cell concentration sampling data from: 03/09/18 through 03/15/18. Cell count data are provided by Texas Parks and Wildlife Department. For a list of sample providers and a key to the cell concentration categories, please see the HAB-OFS bulletin guide: https://tidesandcurrents.noaa.gov/hab/hab_publication/GOMX_HAB_Bulletin_Guide.pdf. Detailed sample information can be obtained through the Texas Parks and Wildlife Department at: <http://www.tpwd.state.tx.us/landwater/water/enviroconcerns/hab/redtide/status.phtml>.

MODIS Aqua satellite chlorophyll image (03/17/18) with possible *K. brevis* HAB areas shown by red polygon(s).

Wind speed and direction are averaged over 12 hours from buoy measurements. Length of line indicates speed; angle indicates direction. Red indicates that the wind direction favors upwelling near the coast. Values to the left of the dotted vertical line are measured values; values to the right are forecasts. Wind observation and forecast data provided by NOAA's National Weather Service (NWS). A text summary of the marine forecast by region is available from NWS at <http://go.usa.gov/xnRax>.

Karenia brevis cell concentration sampling data from: 03/09/18 through 03/15/18. Cell count data are provided by Texas Parks and Wildlife Department. For a list of sample providers and a key to the cell concentration categories, please see the HAB-OFS bulletin guide: https://tidesandcurrents.noaa.gov/hab/hab_publication/GOMX_HAB_Bulletin_Guide.pdf. Detailed sample information can be obtained through the Texas Parks and Wildlife Department at: <http://www.tpwd.state.tx.us/landwater/water/enviroconcerns/hab/redtide/status.phtml>.

Verified and suspected HAB areas shown in red. Other areas with *K. brevis* optical characteristics shown in yellow (see p. 1 analysis for interpretation).

MODIS Aqua satellite chlorophyll image (03/17/18).
