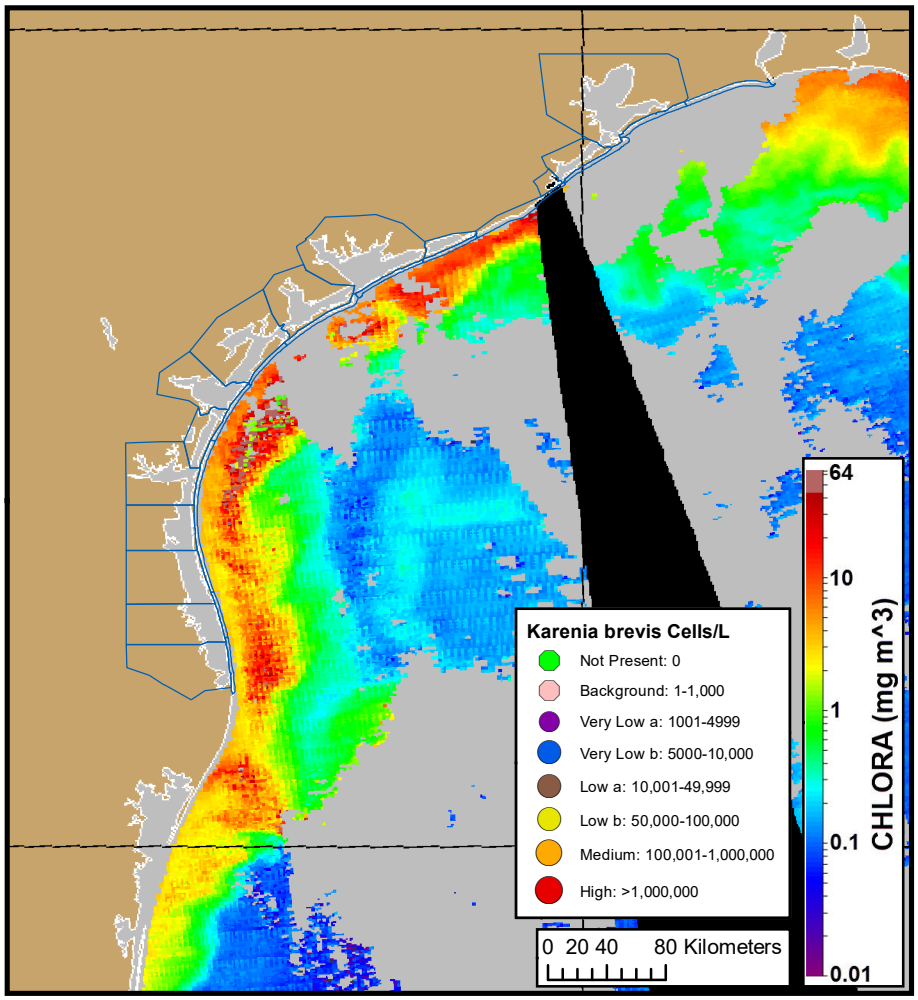
Gulf of Mexico Harmful Algal Bloom Bulletin

Monday, March 26, 2018
NOAA National Ocean Service
NOAA Satellite and Information Service
NOAA National Weather Service

Region: Texas

Instructions for viewing this geospatial pdf are available at: https://go.usa.gov/xn9g2.



Karenia brevis cell concentration sampling data from: 03/16/18 through 03/25/18. Cell count data are provided by Texas Parks and Wildlife Department. For a list of sample providers and a key to the cell concentration categories, please see the HAB-OFS bulletin guide: https://tidesandcurrents.noaa.gov/hab/hab_publication/GOMX_HAB_Bulletin_Guide.pdf. Detailed sample information can be obtained through the Texas Parks and Wildlife Department at: http://www.tpwd.state.tx.us./landwater/water/environconcerns/hab/redtide/status.phtml.

MODIS Aqua satellite chlorophyll image (03/23/18) with possible *K. brevis* HAB areas shown by red polygon(s).

Conditions Report

No respiratory irritation associated with *Karenia brevis* (commonly known as Texas red tide) is expected in this region.

Analysis

Imagery:

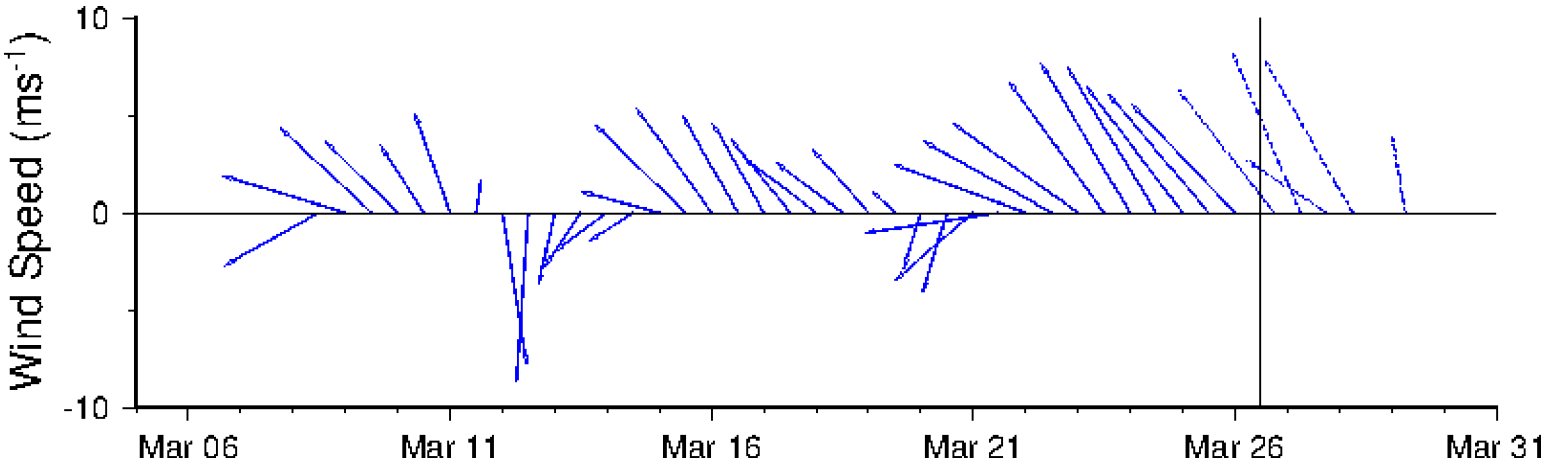
Recent ensemble imagery (MODIS Aqua, 3/23) is partially obscured by clouds along- and offshore the Texas coast, limiting analysis. Elevated to very high chlorophyll (2 to >20 µg/L) is visible from Brazos River to the Rio Grande but it is most likely due to the resuspension of benthic chlorophyll and sediments along the coast.

Forecasts:

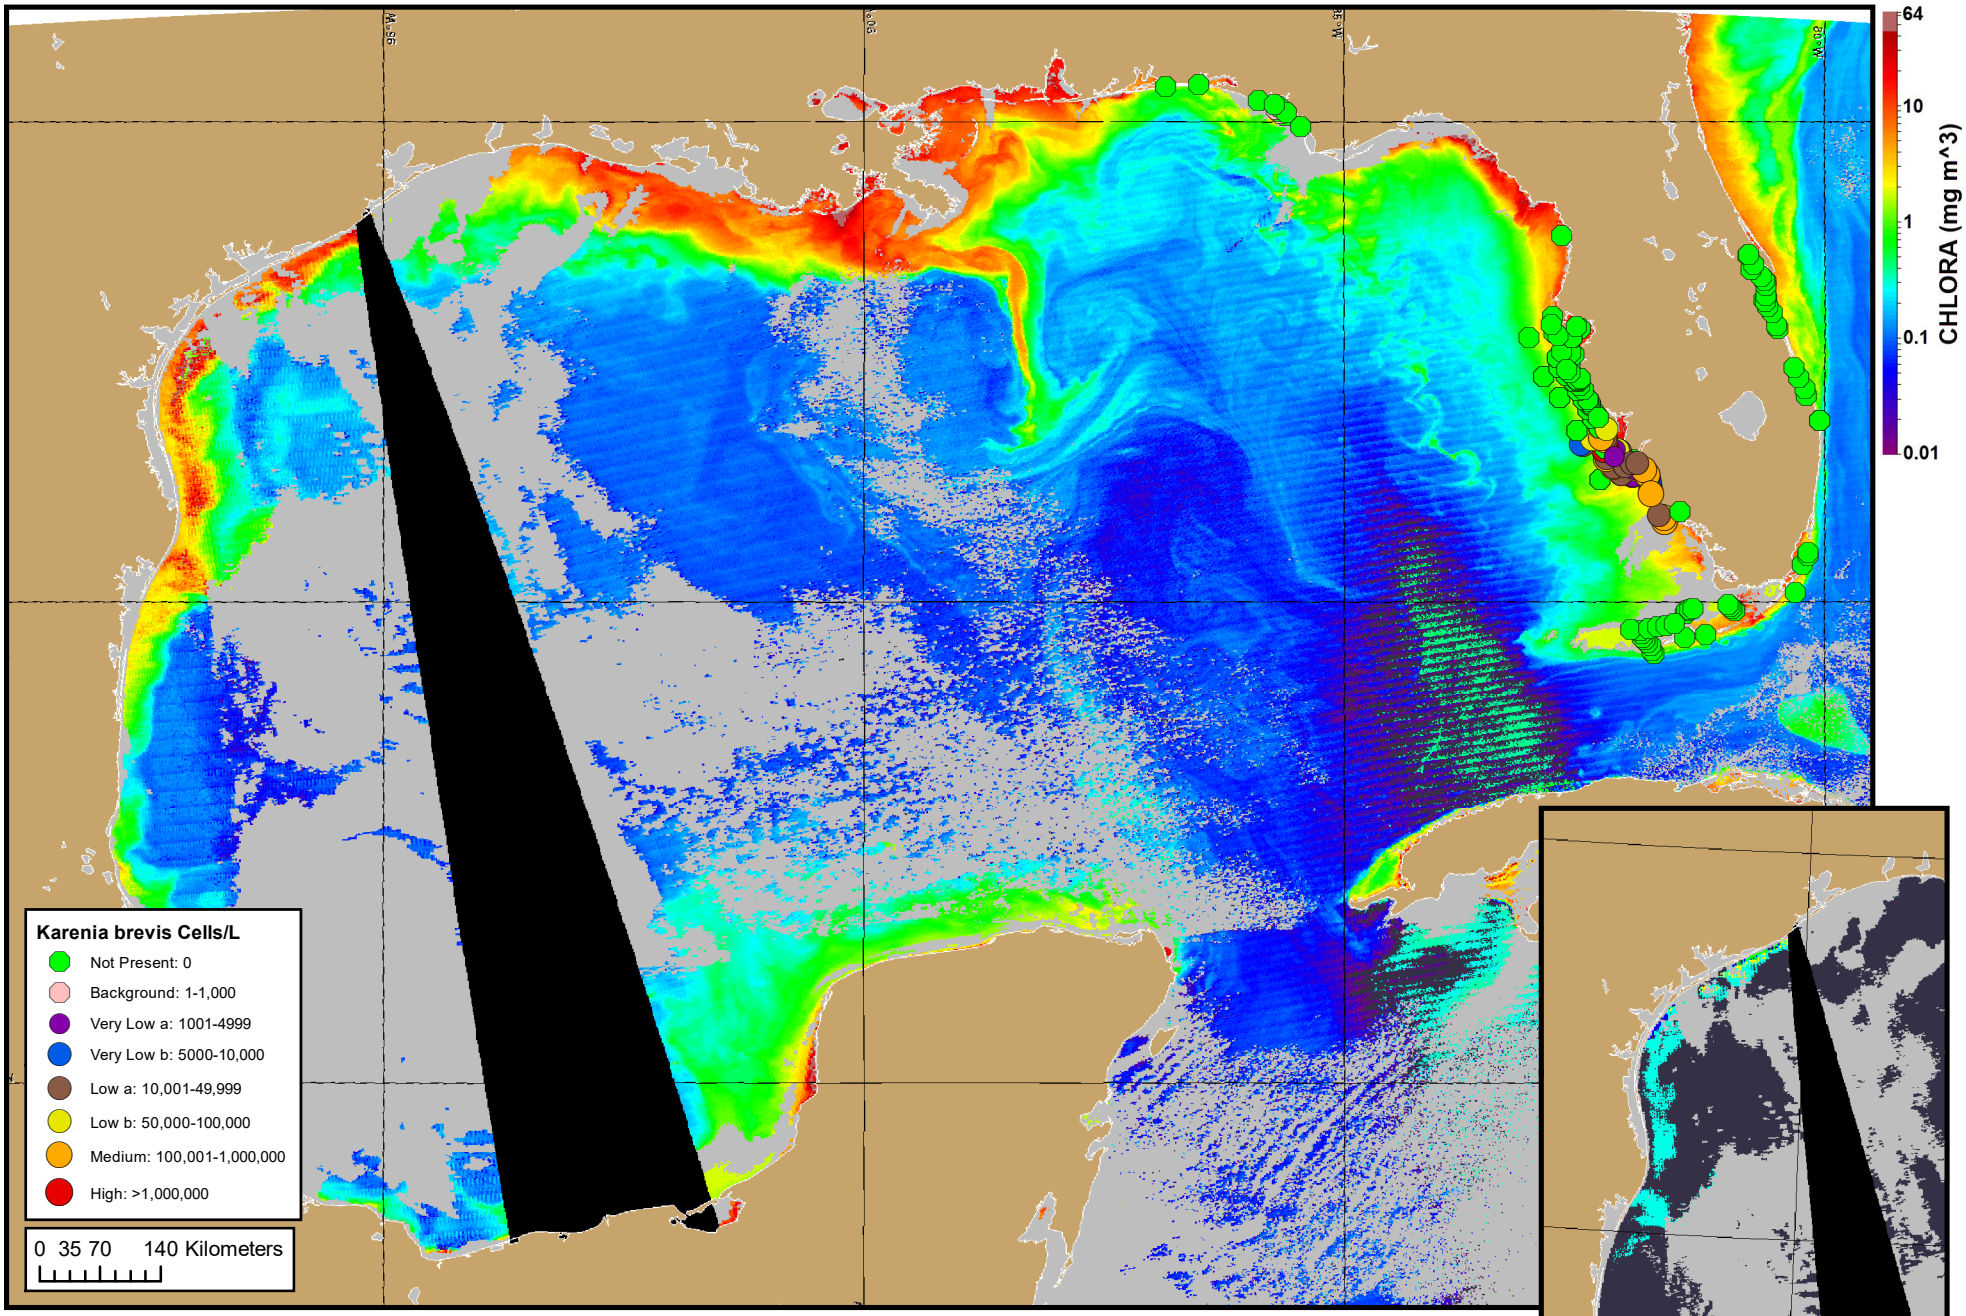
Forecast models based on predicted near-surface currents indicate a potential maximum transport of 20 km north along the coast from Port Aransas from March 23 to 29.

Ludema, Keeney

Wind conditions from Port Aransas-Coast, TX



Wind speed and direction are averaged over 12 hours from buoy measurements. Length of line indicates speed; angle indicates direction. Red indicates that the wind direction favors upwelling near the coast. Values to the left of the dotted vertical line are measured values; values to the right are forecasts. Wind observation and forecast data provided by NOAA's National Weather Service (NWS). A text summary of the marine forecast by region is available from NWS at http://go.usa.gov/xnRax.



Karenia brevis cell concentration sampling data from: 03/16/18 through 03/25/18. Cell count data are provided by Texas Parks and Wildlife Department. For a list of sample providers and a key to the cell concentration categories, please see the HAB-OFS bulletin guide: https://tidesandcurrents.noaa.gov/hab/hab_publication/GOMX_HAB_Bulletin_Guide.pdf. Detailed sample information can be obtained through the Texas Parks and Wildlife Department at: http://www.tpwd.state.tx.us./landwater/water/environconcerns/hab/redtide/status.phtml.

Verified and suspected HAB areas shown in red. Other areas with *K. brevis* optical characteristics shown in yellow (see p. 1 analysis for interpretation).

MODIS Aqua satellite chlorophyll image (03/23/18).
