Summary: Water level stations on Eastern Florida Coast recording surges from ~4.75 feet above normal at Virginia Key to 2.3 feet above normal at Trident Pier and 1.2 feet above normal at Fernandina Beach. Surges remain from 1.2 to 1.5 feet along the Georgia and southern South Carolina coastlines. Barometric pressures beginning to rise again in South Carolina and Georgia, still dropping in Florida as Hurricane Jeanne makes landfall. Additional stations will be monitored as storm surge activity appears.
