Tropical Storm ANA QuickLook, POSTED 12:00 EDT 05/09/2015

NOAA and NOAA Partnership Stations Relative to the Storm

Storm Analysis

As of 05/09/2015 12:00 EDT water levels from the Georgia coast to the central coast of North Carolina are slightly elevated and generally range between 0.5 to 1.5 feet above tidal predictions. Wind speeds along the North and South Carolina coast range from 10 to 20 knots with a few gusts over 30 knots. Barometric pressure has leveled out across the region.
Water Level and Meteorological plots available below are updated automatically. A line denoting Mean Higher High Water (MHHW) is displayed to provide an approximate indication of when flooding inundation may occur.

For additional data, please see the Center for Operational Oceanographic Products & Services website. For more information or archived products and reports, please see the Storm QuickLookHomepage.

Analyst: CRD

TROPICAL STORM ANA ADVISORY # 7

NWS NATIONAL HURRICANE CENTER MIAMI FL  1100 AM EDT SAT MAY 09 2015

...TROPICAL STORM CONDITIONS EXPECTED TO REACH PORTIONS OF THE COASTS OF NORTH AND SOUTH CAROLINA LATER TODAY....

LOCATION...32.7N 77.9W
ABOUT 105 MI S OF WILMINGTON NORTH CAROLINA
MAXIMUM SUSTAINED WINDS...60 MPH
PRESENT MOVEMENT...NW OR 320 DEGREES AT 3 MPH
MINIMUM CENTRAL PRESSURE...1001 MB

WATCHES AND WARNINGS
----------------------
CHANGES WITH THIS ADVISORY:
None.

SUMMARY OF WATCHES AND WARNINGS IN EFFECT:

A Tropical Storm Warning is in effect for...
* South Santee River South Carolina to Cape Lookout

A Tropical Storm Watch is in effect for...
* Edisto Beach South Carolina to South of South Santee River

A Tropical Storm Warning means that tropical storm conditions are expected somewhere within the warning area, in this case within 12-24 hours.

A Tropical Storm Watch means that tropical storm conditions are possible within the watch area, in this case within 12-24 hours.

Interests elsewhere in eastern North Carolina and Virginia should monitor the progress of Ana.

For storm information specific to your area, including possible inland watches and warnings, please monitor products issued by your local National Weather Service forecast office.
DISCUSSION AND 48-HOUR OUTLOOK

At 1100 AM EDT, the center of Tropical Storm Ana was located near latitude 32.7 North, longitude 77.9 West. Ana is moving toward the northwest near 3 mph (6 km/h). A turn toward the north and north-northeast with a gradual increase in forward speed is expected over the next 48 hours. On the forecast track, the center will be very near the coasts of South and North Carolina by Sunday morning.

Maximum sustained winds are near 60 mph with higher gusts. Gradual weakening is forecast as Ana moves over cooler waters close to the coastline.

Tropical storm force winds extend outward up to 125 miles from the center.

An Air Force Reserve Unit Hurricane Hunter aircraft reported a minimum central pressure of 1001 mb.

HAZARDS AFFECTING LAND

WIND: Tropical storm conditions are expected within the warning area, and are possible within the watch area, by this afternoon or evening.

STORM SURGE: The combination of storm surge and the tide will cause normally dry areas near the coast to be flooded by rising waters. The water could reach 1 to 2 ft above ground at times of high tide in coastal areas from Cape Hatteras, North Carolina southward through South Carolina. For information specific to your area, please see products issued by your local National Weather Service forecast office.

RAINFALL: Ana is expected to produce rainfall accumulations of 1 to 3 inches, with isolated amounts of 5 inches, over eastern portions of North Carolina and South Carolina through Monday.

SURF: Swells generated by Ana are affecting portions of the southeastern U.S. coast. These swells will likely cause life-threatening surf and rip currents. Please see statements issued by your local National Weather Service forecast office.

NEXT ADVISORY

Next intermediate advisory at 200 PM EDT.
Next complete advisory at 500 PM EDT.

Forecaster Pasch

For the purpose of timely release, data contained within this QuickLook have undergone a "limited" NOS Quality Assurance/Control; however, the data have not yet undergone final verification. All data subject to NOS verification.
