No further QuickLooks will be posted for this storm unless conditions warrant and the National Hurricane Center (NHC) issues a new Tropical Storm Warning for the U.S. coastline.

As of 07/24/2008 05:30 CDT, Port Isabel water levels have fallen rapidly since DOLLY has moved inland. Water levels north of landfall, from Texas to west Louisiana still remain elevated from 1 to 2 feet above predicted, however some stations are beginning to see falling water levels. Barometric pressure continues to rise. Water levels in bays and associated waterways remain elevated and may include impacts from hydrological forces, including rainfall runoff.
