As of 9/11/2018 18:00 HST, water levels across the Hawaiian Islands continue to be slightly elevated and range between 0.3 and 0.9 feet above normal tide levels. Winds are between 5 and 15 knots with gusts up to 20 knots for most of the stations around the island chain. Hilo, HI is the exception with the fastest wind speeds of 25 knots and gusts up to 30 knots at this time. Barometric pressure is slowly falling.
Water Level and Meteorological plots available below are updated automatically. A line denoting Mean Higher High Water (MHHW) is displayed to provide an approximate indication of when flooding inundation may occur.

For additional real-time and historical inundation information for select stations affected by this storm, please visit Coastal Inundation Dashboard. For additional data, please see the Center for Operational Oceanographic Products & Services website.

Select Central Pacific Hurricane Center Advisory Information:

Tropical Storm Olivia Advisory Number 46
NWS Central Pacific Hurricane Center Honolulu HI
500 PM HST Tue Sep 11 2018

...CENTER OF OLIVIA APPROACHING MAUI COUNTY AND THE BIG ISLAND...

SUMMARY OF 500 PM HST...0300 UTC...INFORMATION

LOCATION...20.9N 154.2W
ABOUT 100 MI...165 KM NE OF HILO HAWAII
ABOUT 240 MI...385 KM E OF HONOLULU HAWAII
MAXIMUM SUSTAINED WINDS...50 MPH...85 KM/H
PRESENT MOVEMENT...W OR 260 DEGREES AT 15 MPH...24 KM/H
MINIMUM CENTRAL PRESSURE...1003 MB...29.62 INCHES

WATCHES AND WARNINGS

CHANGES WITH THIS ADVISORY:

None.

SUMMARY OF WATCHES AND WARNINGS IN EFFECT:

A Tropical Storm Warning is in effect for...
* Kauai County...including the islands of Kauai and Niihau
* Oahu
* Maui County...including the islands of Maui, Molokai, Lanai, and Kahoolawe
* Hawaii County

Interests in the Northwest Hawaiian Islands should monitor the progress of Olivia.

A Tropical Storm Warning means that tropical storm conditions are
expected somewhere in the warning area within 36 hours.

For storm information specific to your area, please monitor products issued by the National Weather Service office in Honolulu Hawaii.

DISCUSSION AND OUTLOOK
----------------------
At 500 PM HST (0300 UTC), the center of Tropical Storm Olivia was located near latitude 20.9 North, longitude 154.2 West. Olivia is moving toward the west near 15 mph (24 km/h). A general west-southwest motion with a slower forward speed is expected this evening as the center of Olivia approaches Maui and the Big Island. After Olivia moves past the islands, a somewhat faster west-southwest motion is expected to resume and continue for the next couple of days.

Maximum sustained winds are near 50 mph (85 km/h) with higher gusts. Gradual weakening is forecast during the next 48 hours, but Olivia is expected to remain a tropical storm as it moves over the main Hawaiian Islands.

Tropical-storm-force winds extend outward up to 105 miles (165 km), mainly to the north of the center.

The estimated minimum central pressure is 1003 mb (29.62 inches).

HAZARDS AFFECTING LAND
------------------------
WIND: Tropical storm conditions are expected over portions of Maui County and the Big Island starting this evening. Tropical storm conditions are expected over Oahu starting tonight. Tropical storm conditions are expected over Kauai County starting Wednesday. Remember that wind gusts can be much stronger near higher terrain, particularly through gaps between mountains and where winds blow downslope.

RAINFALL: Showers will continue to increase over portions of the main Hawaiian Islands tonight and Wednesday. Olivia is expected to produce total rainfall accumulations of 5 to 10 inches in some areas, with isolated maximum amounts of 15 inches possible, especially in higher terrain. This rainfall may produce life-threatening flash flooding.

SURF: Large swells generated by Olivia will impact the main Hawaiian Islands over the next couple of days. This will result in dangerously high and potentially damaging surf, mainly along exposed east facing shores.
NEXT ADVISORY
-------------
Next intermediate advisory at 800 PM HST.
Next complete advisory at 1100 PM HST.

Forecaster R Ballard

For the purpose of timely release, data contained within this QuickLook have undergone a "limited" NOS Quality Assurance/Control; however, the data have not yet undergone final verification. All data subject to NOS verification.
