Storm Analysis

As of 11/21/2015 02:30 ChST, water levels at Pago Bay are slightly elevated around 1.0 ft above predicted tide levels; Apra Harbor is currently measuring 0.10 ft below predictions. Winds are around 5-10 knots with gusts up to 20 knots at Pago Bay. Barometric pressure is slowly falling.
Water Level and Meteorological plots available below are updated automatically. A line denoting Mean Higher High Water (MHHW) is displayed to provide an approximate indication of when flooding inundation may occur.

For additional data, please see the Center for Operational Oceanographic Products & Services website. For more information or archived products and reports, please see the Storm QuickLook Homepage.
